Engineering Analysis with Boundary Elements 30 (2006) I–VII

ENGINEERING ANALYSIS *with* BOUNDARY ELEMENTS

www.elsevier.com/locate/enganabound

Contents of Volume 30

Number 1

1 Shape design sensitivity analysis with respect to the positioning of features in composite structures using the boundary element method
A. TAFRESHI (UK)

14 BEM modeling of surface water wave motion with laminar boundary layers
M. JAMALI (Iran)

22 A boundary element sensitivity formulation for contact problems using the implicit differentiation method
G.K. SFANTOS & M.H. ALIABADI (UK)

31 Boundary element method for shear deformable plates with combined geometric and material nonlinearities
SUPRIYONO & M.H. ALIABADI (UK)

43 A new meshless method based on MLPG for elastic dynamic problems
S.Y. LONG, K.Y. LIU & D.A. HU (China)

49 Effectiveness of GMRES-DR and OSP-ILUC for wave diffraction analysis of a very large floating structure (VLFS)
N. MAKIHATA, T. UTSUNOMIYA & E. WATANABE (Japan)

59 A modified Rayleigh–Plesset model for a non-spherically symmetric oscillating bubble with applications to boundary integral methods
E. KLASEBOER & B.C. KHOO (Singapore)

72 A simple and less-costly meshless local Petrov-Galerkin (MLPG) method for the dynamic fracture problem
L. KAIYUAN, L. SHUYAO & L. GUANGYAO (China)

Number 2

77 Solving biharmonic problems with scattered-point discretization using indirect radial-basis-function networks
N. MAI-DUY & T. TRAN-CONG (Australia)

88 Two-dimensional time-harmonic BEM for cracked anisotropic solids
F. GARCÍA-SÁNCHEZ, A. SÁEZ & J. DOMÍNGUEZ (Spain)

100 The singular function boundary integral method for a two-dimensional fracture problem
M. ELLIOTIS, G. GEORGIOU & C. XENOPHONTOS (Cyprus)

107 A bone adaptation integrated approach using BEM
G. MARTÍNEZ & M. CERROLAZA (Venezuela)

116 Multiwavelet Galerkin boundary element solution of Laplace's equation
S. AMINI & S.P. NIXON (UK)

124 BE analysis of bottom sediments in dynamic fluid-structure interaction problems
J.J. AZNÁREZ, O. MAESO & J. DOMÍNGUEZ (Spain)

137 Axisymmetric multiquadrics
B. ŠARLER, N. JELIČ, I. KOVAČEVIČ, M. LAKNER & J. PERKO (Slovenia)

doi:10.1016/S0955-7997(06)00204-9

143 A note on the relation between the boundary- and finite-element method with application to Laplace's equation in two dimensions
C. POZRIKIDIS (USA)

Number 3

149 Non-traditional boundary integral formulations—Part II
V. SLADEK & J. SLADEK (Slovak Republic)

150 The method of fundamental solutions for Helmholtz eigenvalue problems in simply and multiply connected domains
S.YU. REUTSKIY (Ukraine)

160 Crack analysis using an enriched MFS domain decomposition technique
C.J.S. ALVES & V.M.A. LEITÃO (Portugal)

167 A frequency-domain BEM for 3D non-synchronous crack interaction analysis in elastic solids
V.V. MYKHAS'KIV (Ukraine), CH. ZHANG (Germany), J. SLADEK & V. SLADEK (Slovakia)

176 3D elastic wave propagation modelling in the presence of 2D fluid-filled thin inclusions
A. TADEU, P.A. MENDES & J. ANTÁNIO (Portugal)

194 Transient heat conduction analysis by triple-reciprocity boundary element method
Y. OCHIAI (Japan), V. SLADEK & J. SLADEK (Slovakia)

205 Null-field Integral Equations for Stress Field around Circular Holes under Antiplane Shear
J.-T. CHEN, W.-C. SHEN & A.-C. WU (Taiwan)

218 Localized direct boundary-domain integro-differential formulations for incremental elasto-plasticity of inhomogeneous body
S.E. MIKHAILOV (UK)

227 Solution of a two-dimensional bubble shape in potential flow by the method of fundamental solutions
B. ŠARLER (Slovenia)

Number 4

237 Weakly singular integral equations for Darcy's flow in anisotropic porous media
J. RUNGAMORNRAT & M.F. WHEELER (USA)

247 Results on meshless collocation techniques
L. LING (ROC), R. OPFER & R. SCHABACK (Germany)

254 Comparison of mixed and isoparametric boundary elements in time domain poroelasticity
D. PRYL (Germany) & M. SCHANZ (Austria)

270 Effective condition number and superconvergence of the Trefftz method coupled with high order FEM for singularity problems
H.-T. HUANG & Z.-C. LI (ROC)

284 On the indentation of an inhomogeneous anisotropic elastic material by multiple straight rigid punches
D.L. CLEMENTS (Australia) & W.T. ANG (Singapore)

292 The Trefftz method for solving eigenvalue problems
Z.-C. LI, T.-T. LU, H.-S. TSAI (ROC) & A.H.D. CHENG (USA)

309 A boundary element phantom head for binaural hearing simulation
Y. KAGAWA, S. OHNOGI & L. CHAI (Japan)

315 A spectral collocation method with triangular boundary elements
C. POZRIKIDIS (USA)

Number 5

325 Anisotropic heat conduction across an interface crack/defect filled with a thin interstitial medium
Y.C. SHIAH & Y.-X. SHI (ROC)

338 Three-dimensional fundamental solutions for transient heat transfer by conduction in an unbounded medium, half-space, slab and layered media
A. TADEU, N. SIMÕES (Portugal)

350 Sub-surface crack in an inhomogeneous half-plane: Wave scattering phenomena by BEM
P.S. DINEVA (Bulgaria), G.D. MANOLIS (Greece) & T.V. RANGELOV (Bulgaria)

363 A time-domain boundary element formulation for the dynamic analysis of non-linear porous media
D. Soares Jr, J.C.F. Telles & W.J. Mansur (Brazil)

371 The fast multipole boundary element method for potential problems: A tutorial
Y.J. LIU (USA) & N. NISHIMURA (Japan)

382 BEM based on discontinuous solutions in the theory of Kirchhoff plates on an elastic foundation
GH. MORARU (Moldova)

391 Mechanical quadrature methods and their splitting extrapolations for solving boundary integral equations of axisymmetric Laplace mixed boundary value problems
Z. RUI, H. JIN & L. TAO (PR China)

399 A modified meshless local Petrov-Galerkin method to elasticity problems in computer modeling and simulation
D.A. HU, S.Y. LONG, K.Y. LIU & G.Y. LI (China)

405 Some comments on the ill-conditioning of the method of fundamental solutions
C.S. CHEN, H.A. CHO & M.A. GOLBERG (USA)

411 Solution of magnetohydrodynamic flow problems using the boundary element method
M. TEZER-SEZGIN & S.H. AYDIN (Turkey)

Number 6

419 Boundary element modeling of radio base station antennas
D. POLJAK, V. DORIC (Croatia), D. VUCICIC & C.A. BREBBIA (UK)

426 Efficient stress evaluation of stationary viscoelastic rolling contact problems using the boundary element method: Application to viscoelastic coatings
J.A. GONZÁLEZ & R. ABASCAL (Spain)

435 Boundary reduction technique and triangular differential quadrature domain decomposition method for polygonal region
Y.-E REN & X. WU (PR China)

441 Conjugate gradient methods for three-dimensional BEM systems of equations
F.P. VALENTE & H.L. PINA (Portugal)

450 A boundary integral method for multiple circular holes in an elastic half-plane
A. Dejoie (France), S.G. Mogilevskaya & S.L. Crouch (USA)

465 Iterative domain decomposition meshless method modeling of incompressible viscous flows and conjugate heat transfer
E. DIVO & A. KASSAB (USA)

479 Closed form coefficients in the symmetric boundary element approach
S. TERRAVECCHIA (Italy)

489 Application of BEM to generalized plane problems for anisotropic elastic materials in presence of contact
A. BLÁZQUEZ, V. MANTIČ & F. PARÍS (Spain)

503 Numerical study on the dynamics of an electrical discharge generated bubble in EDM
M.T. SHERVANI-TABAR, A. ABDULLAH & M.R. SHABGARD (Iran)

515 A meshless method for generalized linear or nonlinear Poisson-type problems
H. Wang (PR China) & Q.-H. Qin (PR China, Australia)

Number 7

523 Preconditioned multiwavelet Galerkin boundary element solution of Laplace's equation
S. AMINI & S.P. NIXON (UK)

531 A time domain harmonic BEM implementation for non-homogeneous 3D solids
C.H. DAROS & E. MESQUITA (Brazil)

539 A boundary element method for calculating the shape and velocity of two-dimensional long bubble in stagnant and flowing liquid
H. HA-NGOC (Vietnam) & J. FABRE (France)

553 A parallel domain decomposition boundary element method approach for the solution of large-scale transient heat conduction problems
K. ERHART, E. DIVO & A.J. KASSA (USA)

564 Large eddy simulation of turbulent flows in external flow field using three-step FEM–BEM model
D.L. YOUNG (Taiwan), T.I. ELDHO (India) & J.T. CHANG (Taiwan)

577 Effect of defective holes on crack using the boundary element method
J. PU (China)

582 Optimisation of an alternating current multi-conductor system
C. MUNTEANU, V. TOPA, E. SIMION, G. MATES, L. GRINDEI (Romania), G. DE MEY & M. PURCAR (Belgium)

588 On the a-priori error analysis and convergence of meshless BEM
M. ELANSARI & D. OUAZAR (Morocco)

598 Point interpolation collocation method for the solution of partial differential equations
X. LIU (PR China) & K. TAI (Singapore)

610 Erratum to "Iterative coupling of FEM and BEM in 3D transient elastodynamics" [Engineering Analysis with Boundary Elements, 29 (2005) 775–787]
O. VON ESTORFF & C. HAGEN (Germany)

611 Iterative coupling of FEM and BEM in 3D transient elastodynamics
O. VON ESTORFF & C. HAGEN (Germany)

Number 8

623 Singular boundary elements for three-dimensional elasticity problems
B.B. GUZINA, R.Y.S. PAK (USA) & A.E. MARTÍNEZ-CASTRO (Spain)

640 Application of the complete multiple reciprocity method for 3D impedance extraction with multiple frequency points
C. YAN, W. YU & Z. WANG (China)

650 Inverse heat conduction problems by meshless local Petrov–Galerkin method
J. SLADEK, V. SLADEK (Slovakia) & Y.C. HON (Hong Kong)

662 Boundary element implementation of doubly periodic inclusion problems
C.Y. DONG (China) & K.Y. LEE (korea)

671 Two-dimensional velocity-vorticity based LES for the solution of natural convection in a differentially heated enclosure by wavelet transform based BEM and FEM
J. RAVNIK, L. ŠKERGET & M. HRIBERŠEK (Slovenia)

687 Computation of 3D MEMS electrostatics using a nearly exact BEM solver
S. MUHKOPADHYAY & N. MAJUMDAR (India)

697 A collocation method using new combined radial basis functions of thin plate and multiquadraic types
S.G. AHMED (Egypt)

702 Dual error indicators for the local boundary integral equation method in 2D potential problems
X.F. GUO & H.B. CHEN (PR China)

709 Virtual boundary element-integral collocation method for the plane magnetoelectroelastic solids
X.-C. LI & W.-A. YAO (PR China)

I Calendar

Number 9

719 Static and free vibration analysis of composite shells by radial basis functions
A.J.M. FERREIRA, C.M.C. ROQUE & R.M.N. JORGE (Portugal)

734 Analysis of the surface plasmon resonance of a single core-shelled nanocomposite by surface integral equations
J.-W. LIAW (Taiwan)

746 Boundary element modelling to solve the Grad–Shafranov equation as an axisymmetric problem
M. ITAGAKI & T. FUKUNAGA (Japan)

758 A modified Gauss quadrature formula with special integration points for evaluation of Quasi-singular integrals
E.E. THEOTOKOGLOU & G. TSAMASPHYROS (Greece)

767 Reconstruction of time-dependent boundary heat flux by a BEM-based inverse algorithm
R. BIALECKI (Poland), E. DIVO & A. KASSAB (USA)

774 Computability of series representations for Green's functions in a rectangle
Y.A. MELNIKOV & M.Y. MELNIKOV (USA)

781 Non-steady state heat conduction across an imperfect interface: A dual-reciprocity boundary element approach
W.-T. ANG (Singapore)

790 Note on the removal of rigid body motions in the solution of elastostatic traction boundary value problems by SGBEM
R. VODIČKA (Slovakia), V. MANTIČ & F. PARÍS (Spain)

799 An approximate method for evaluating hypersingular integrals
I.V. BOYKOV (Russia), A.I. BOIKOVA & E.S. VENTSEL (USA)

I Calendar

Number 10

809 A domain-type boundary-integral-equation method for two-dimensional biharmonic Dirichlet problem
N. MAI-DUY, T. TRAN-CONG & R.I. TANNER (Australia)

818 Modelling of highly-heterogeneous media using a flux-vector-based Green element method
P. LORINCZI, S.D. HARRIS & L. ELLIOTT (Leeds, UK)

834 Analysis of 3D cracks in anisotropic multi-material domain with weakly singular SGBEM
J. RUNGAMORNRAT (Thailand)

847 Solution of transient direct-chill aluminium billet casting problem with simultaneous material and interphase moving boundaries by a meshless method
R. VERTNIK, M. ZALOŽNIK & B. ŠARLER (Slovenia)

856 A 3-D indirect boundary element method for bounded creeping flow of drops
G. ZHU, A.A. MAMMOLI & H. POWER (Nottingham, UK)

869 On the use of piecewise linear wavelets for fast construction of sparsified moment matrices in solving the thin-wire EFIE
A. GERANMAYEH, R. MOINI & S.H. HESAM SADEGHI (Iran)

882 Regularized meshless method for multiply-connected-domain Laplace problems
K.H. CHEN, J.H. KAO, J.T. CHEN, D.L. YOUNG & M.C. LU (Taiwan)

897 MFS with time-dependent fundamental solutions for unsteady Stokes equations
C.C. TSAI, D.L. YOUNG, C.M. FAN & C.W. CHEN (Taiwan, ROC)

Number 11

909 Applications in micro- and nanoelectromechanical systems
S. MUKHERJEE & N.R. ALURU (USA)

910 Modeling of the ground plane in electrostatic BEM analysis of MEMS and NEMS
H. CHEN & S. MUKHERJEE (USA)

925 A Lagrangian approach for quantum-mechanical electrostatic analysis of deformable silicon nanostructures
G. LI & N.R. ALURU (USA)

940 Dual BIE approaches for modeling electrostatic MEMS problems with thin beams and accelerated by the fast multipole method
Y.J. LIU (USA)

949 Analysis of electrostatic MEMS using meshless local Petrov–Galerkin (MLPG) method
R.C. BATRA, M. PORFIRI & D. SPINELLO (USA)

963 A 2-D model that accounts for 3-D fringing in MEMS devices
K. SURESH & M. SINHA (USA)

971 Null-field approach for piezoelectricity problems with arbitrary circular inclusions
J.-T. CHEN & A.-C. WU (Taiwan)

994 Simulation of an extruded quadrupolar dielectrophoretic trap using meshfree approach
C.X. SONG, G. LIU, H. LI (Singapore) & X. HAN (China)

1006 Theoretical investigation of gas separation inside a microchannel by thermal diffusion
W. YE, Y.-K. YOON & M. ALLEN (USA)

1011 Modeling and simulation of the deformation of multi-state hydrogels subjected to electrical stimuli
K.Y. LAM, H. LI, T.Y. NG & R. LUO (Singapore)

Number 12

1019 Complex variable boundary element method
T. HROMADKA (USA)

1020 Theoretical developments in the complex variable boundary element method
R.J. WHITLEY & T.V. HROMADKA II (USA)

1025 A scheme to randomly generate surface dust points for the 3D complex variable boundary element method (CVBEM)
M. HUBER & R. HICKMAN (USA)

1030 Determination of groundwater flownets, fluxes, velocities, and travel times using the complex variable boundary element method
T.C. RASMUSSEN (USA) & G. YU (China)

1045 Consideration of a CVBEM approximation for plane hydrodynamics
T. PETRILA (Romania)

1049 Complex variable boundary integral method for linear viscoelasticity: Part I—basic formulations
Y. HUANG, S.G. MOGILEVSKAYA & S.L. CROUCH (USA)

1057 Complex variable boundary integral method for linear viscoelasticity Part II—application to problems involving circular boundaries
Y. HUANG, S.G. MOGILEVSKAYA & S.L. CROUCH (USA)
